## Premium 5Cr15MoV Stainless Steel Kitchen Sets, Outdoor Hunting Kits and Accessories

### Blade Steel Materials:

The blade steel material is one of the most important components of any knife and Shibazi ensures that the best steel materials are used in their knife production.

5Cr15MoV is a Premium Stainless Steel that retains a sharp edge, is stain resistant and easily re-sharpened.

This Premium steel is used in all of our Shibazi Knives.

# Kitchen Sets

Proudly Made in Yangjiang, China - The superb quality Shibazi products are made in a Southern Chinese metal working city with a proud history of Hand Forged knives dating back 1400 years. The unrelenting quest for quality resulted in Shibazi becoming the household Kitchen Knife Centre of China and is China's top Kitchen Knife brand. Now Shibazi's reputation for quality is growing into a worldwide success story...

## Handle Materials:

Shibazi handles are ergonomically designed for a comfortable user friendly grip. The materials and design used in the development of the handles are specially chosen to best suit functionality and a variety of blade shapes.

## ABS (Acrylonitrile-

butadiene-styrene) is a handle material that is easily moulded, allowing for a tough hard working handle that is impervious to extreme temperature changes, making it ideal for work in the kitchen.

## Stainless Steel provides

a robust working handle. Stainless steel handles are also available hollowed to make the knife handle lighter in weight. The appeal of a stainless steel handle also lies in that they are extremely hygienic and easy to clean.

## Wood handles are

used to give each knife a distinctive look as no wood grain is exactly the same. Wooden handles are also used for their strong, durable qualities and unique colours.

# Picnic / Kitchen Sets

In the steel making process a vacuum heat treatment bonds the carbon elements, improves the anti-fatigue intensity of the knife and makes the steel impervious to rust. This specialized and refined steel making process that Shibazi follows ensures that the steel retains a superior edge and hardness while being flexible enough not to compromise the quality of the steel.

## Knife Blades & their uses:

### Utility Knife:

Any Chef or Cooks kitchen companion, the utility knife is small and nimble enough to slice vegetables and fruit evenly, assisting in the preparation and presentation of food.

### Paring Knife:

the paring knife is slightly smaller than the utility knife but is efficient in the finer details of food preparation of vegetables and fruits.

### Steak Knife:

A thinly ground knife blade, which has either a plain or a serrated edge made specifically for use when serving meat dishes to guests.

# Hunting / Outdoor Kits

The research and development into building a top brand has been at the forefront of all Shibazi's endeavors. They strive to produce quality kitchen knives that meet the market demands of today. This dedication sets Shibazi above the rest - every aspect of the knife making process is controlled by Shibazi, from the Steel manufacturing right through to the laboratory analysis and quality control of the knives.

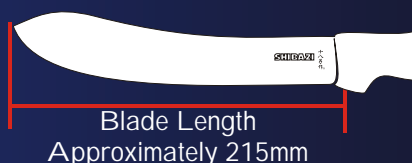

## Knife Blades & their uses:

### Chef's Knife:

One of the larger blades in your collection that serves function for numerous tasks in food preparation as the long curved belly allows you to dice and chop food. The large blade also facilitates chopping and preparing larger cuts of meat.

### Butcher's Knife:

Larger than the Chef's knife, the Butcher's knife has a deeper belly and is ideal for the chopping and dressing of large cuts of meat.

### Hunting Skinning Knife:

Smaller than the butcher's knife but defined by the deep belly of the blade, this shape allows you to slide easily between the skin and meat of the animal separating your meat cuts efficiently.

## SH3004 - Outfitter Kit

# Hunting & Fishing Knives

Shibazi has not only provided the South African Market with top quality kitchen sets but has also produced specialized kits that suit our hunting and fishing markets. These kits have proven indispensable in the field when dressing meat or filleting fish, the knives retain a sharp edge and are easily re-sharpened with the handy tungsten carbide field sharpener, all available at an affordable price.

## Knife Blades & their uses:

### Filleting Knife:

A long thin blade, which is flexible in order to be able to weave around while cutting the fish and separate the flesh from the bones simply and easily.

### Boning Knife:

A thin blade long enough to be angled in and around the bone in meat in order to evenly cut away the flesh.

### Gut Hook Skinning Knife:

The Gut Hook at the tip of your blade easily zips open the skin of your carcass without compromising the meat within by piercing any vitals which could spoil the meat. The skinning blade then easily slides between the skin and flesh to of the animal for easy field dressing.

## SH3010 - Bird & Trout Filleting Kit

# Individual Knives

## Premium 5Cr15MoV Stainless Steel Kitchen Sets & Outdoor Hunting Kits

### Knife Blades & their uses:

#### Slicing/Pastry Knife:

Blade Length  
Approximately 254mm

A long thin blade defined by the great length of the blade, this allows you to slice large cuts of food with a single smooth motion. Often with a rounded tip so as not to pierce the food.

#### Bread Knife:

Blade Length  
Approximately 140-180mm

A long blade defined by deep serrations made to easily cut through hard crusts of bread while still smooth enough not to tear apart the softer inside of the bread loaf.

#### Carving Fork:

Prong Length  
Approximately 150mm

A lengthened fork made to hold larger cuts of meat or whole chickens while carving the meat.

### SH2904 - Slicing/Pastry Knife

5 Cr15MoV Stainless Steel

Textured Stainless Steel Handles

254mm Slicer Pastry Knife

# Accessories

## Premium 5Cr15MoV Stainless Steel Kitchen Sets, Outdoor Hunting Kits and Accessories

A little Care always goes a long way in maintaining the quality of your knife, so always... Keep a sharpener handy to maintain a sharp working edge - as dull blade is dangerous to work with.

Never leave your knives in dirty dish water as reaching in may result in accidently cutting yourself. Clean the knives with a non abrasive cleaning cloth.

Make sure the knives are cleaned and dried properly after use as the high carbon content that provides the extreme cutting power can stain if left wet for a prolonged period of time.

### SH5001 - Tungsten Carbide Sharpener

Fast, efficient and easy to use, hand held knife sharpener.

Sharpen your Kitchen & utility knives with 3-5 strokes.

Reversible Tungsten Carbide inserts for double the life.

SH5005 - Replaceable Tungsten Carbide inserts

### SH2001 - Shibazi Kitchen Scissors

Extreme Cutting Power, the Shibazi Scissors are handy in and around the house featuring a useful Nut Cracker

### SH8001 - Swoosh Knife Holder

Removable "Spaghetti" inserts which are Dishwasher friendly

Fits any array of knives that you choose

Arrange and store your kitchen knives in any way you please... The Shibazi Swoosh adds convenience and style to your kitchen.

Please note the Knife Block does not come with knives
