MS5123 - 220V AC Charging Unit & 12V DC Charging Adaptor

Longer lasting, whiter brighter Light

AC-Charging Point (MS5123 only)

Flip-Up/Down Carry Handle

DC-Charging Point (DC Models Only)

Wall Mountable

MS5250 - Lamp Holder (Aluminum)

▶ Holds 1-4 Emergency Lamps

▶ Can be hung by the hook & threaded to fit any standard photographic tripod.

Emergency Multi-use Lanterns: work as emergency lighting units during power outages, leave the Lantern plugged into the mains - switched to the "on" position. When the electricity fails the lantern will automatically light up. Built-in discharge protection circuit and a built-in overcharge protection circuit. These built-in protection circuits prevent your unit from overcharging or discharging to the point that you damage the battery.

Ideal for lighting up camping trips and outdoor events as well as household use. Your Lanterns provide light for 50 hours in the 24 LED Lantern mode and up to 100 hours in the 4 LED Flashlight mode. The LED Life is 10,000 working hours. The NEW design registered silver reflector also provides a 200% brighter surround light distribution. In order to get the maximum life from the battery, recharge the unit after every use and if stored, recharge every two months.

Great for the Outdoors
or at home

Emergency Function:
Once your unit is on charge you can leave the lantern on the "on" position. In the event of a power failure the LED unit will switch on automatically.

Discharge Protection Circuit: To protect the battery, your unit will switch off automatically before the battery is fully discharged. Be sure to recharge your unit as soon as possible once this occurs.

Fully charge the unit before initial use (20-24 hours). It is essential to charge the unit after every use.

If stored it is important to fully charge the unit and then recharge the unit every 2 months (Your battery will be damaged if the unit is stored without a charge).

Outdoor & Emergency
Lighting Equipment

ULTRATEC®

Never worry about replacing your bulbs again as LEDs run for more than 10 000 working hours...

LEDs produce a whiter brighter light, which use minium draw power on the batteries - so your units shine brighter with longer run times than incandescent or fluorescent lighting products.

Durable and hard working the UltraTec lighting equipment is great for the outdoors and as indoor lighting when the power fails. The lights that carry on working when nothing else does...
