switz+[®] tool

Quality Specifications: Precision Crafted Blades, formed from tough Aircraft grade AISI S2M. Chrome - Vanadium - Molybdenum Alloy components. Extra Strengthened and hardened for Longer Life. High Torque handle built from steel, tough fibre and reinforced advanced composites.

Each Switz Tool features a choice of six utility blades per application driver. The blades are nestled securely into **the handle** of the multi-functional driver so that there is **no chance** of losing any of the utility blades.

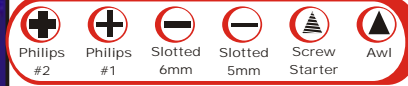

Choose yours...

Ensure you have the necessary tool available for the job at hand, so make the choice today of which tool best suits your application.
